EXPERIENCE

WORK BY MY OWN

Autlán de Navarro(2020 - current)

I developed two PHP apps with HTML, CSS, BOOTSTRAP, CRUD, AJAX, JQUERY, MYSQL, JSON, PHP. Both apps was developed with MVC Arquitecture and web responsive to mobile and browsers.

Development of a system for a network of meteorological stations

Together with my work team, I developed a system to measure the meteorological stations of the south coast region using HTML5, CSS3, JS, PHP as SERVER-SIDE using MySQL with AJAX requests, and using JSON.

I developed a website for a restaurant with dinamic menú

Using technologies such as HTML5, CSS3, JS for interaction and animations, PHP connected to MySQL for menu management, using EMAIL FUNCTION to send emails through a form with BOOTSTRAP as CCS3 framework.
